Work Experience

Feb 2020 - Present   **Data Scientist**

COFCO International

Nov 2017 – Jan 2018   **Machine learning Intern**

Yoroi Srl

- Developed a neural network for classifying different types of malware, which has been tested in production.

Education

2018 – 2019   **University of Manchester, UK**

Master of Science in Artificial Intelligence

- Dissertation involved developing an AI system, based on motion graphs, for generating novel character animations using motion capture data.
- Used NLP techniques to mine tweets about Brexit impact on the job market. This involved topic modelling, sentiment analysis and name entity recognition.
- Modules: Machine Learning, Modelling of High-Dimensional Data, Text Mining, Computer Vision, Software Engineering, Agile Development

2014 – 2018   **University of Bologna, Italy**

Laurea in Computer Science and Engineering

- Dissertation in Computer Graphics involved in developing a virtual reality application for medical imaging diagnosis using Unity 3D and the Steam VR platform.
- Led a team project designing and developing a sandbox physics simulator of the solar system in Java, using the MVC architecture.

Technical knowledge and Skills

- **Machine learning:** Tensorflow 2.0, Keras, DL4J, Scikit-learn
- **Programming:** C/C++, Java, Python, Scala, Bash scripting, Matlab
- **Parallel programming in C:** OpenMP, MPI, and CUDA
- **DB and cloud:** MySQL, Google Cloud Compute Engine and Firestore
- **Software engineering:** Git, UML design, Testing, Agile practices
- **Languages:** English (fluent), Italian (native), Chinese (intermediate)
